Literary Department.

IN OLD NEW ENGLAND.

From the press of the Putnams comes a paper-covered story by Frank K. Hosmer, which seems us very much better worth reading than the stories of Miss Wilkins. In fact, of most of the present generation of New England story-tellers, "How Thankful Was Bewitched" is the title of it; and it takes us among strange scenes and into the heart of a life that is now gone forever. To many of us, no doubt, those times in early New England seem shadowy, and the men and women who lived then seem like persons of another species. But they fought and prayed and loved and suffered as men and women have done before and since. Their environment was strange, and the times in which they lived were wild and hard; but they were human, and this book takes us right into the midst of them, and we see them as they were.

Thankful, was a maiden who was beloved of Remembrance Pumery, and who married him, although she did not love him. There came one day a stranger to the village, who represented himself to be a Huguenot driven from the land of his birth by religious persecution. The editor of the meeting house had not long before that bought a new bell for their place of worship—a bell which had the motto of the Jesuits cast in its rim, and which seemed sometimes to shine with a strange and eerie light that did not come from the sun or moon. By and by there was an Indian attack, and the bell, and Thankful and some others with her were carried off as prisoners to Canada. The bell had been cast for the Jesuit mission, and the expedition had been made, in the dead of winter, to recover it. The principal actor in the recovery, as he is in the story, is Thankful herself, is the Jesuit priest.

The story of Thankful's life in captivity is a strange one. She went with a party of explores, away out to the Missouri river; and they had adventures in plenty by the way. In these the character of Thankful and the priest and his companion the Steur, commander of the expedition, who was more or less than the strange Huguenot, who had come to the New England village, are brought out most vividly. We will not spoil the story by telling the real motive of it, which is to say, one man, and yet altogether不堪, nor will we tell how the story ended. It is a story that is worth reading to find out what happened, as well as for the character-drawing of the principal personages in it. It is a strong story, and well told vivid, picturesque, dramatic. Mr. Hosmer has struck a new vein, and it runs high in play dirt.

MORE MEMORIES OF DIAN HOLE.

Those who have read the "Memories" of Dian Hole will not need to be told of his quality. This second volume of memoirs consists of the addresses which he is now delivering in this country. There is a series of familiar talk on various themes, and are full of reminiscences of men whom the good Dean has known well in his long life. That they were men worth knowing goes without saying—there are Cardinal Newman and Dr. Pusey to take the first two that come to mind. Of those two, the Dean considers Pusey to have been the greater man, and gives his reasons for this opinion.

Such a book as this is almost impossible to describe. It rambles along, in an easy, pleasant fashion, bringing in descriptions of men and events, funny stories, puns, and all sorts of little personal items. It is like the easy conversation of a good talker who has seen many things and has enjoyed most of them. The good Dean is an optimist in every fibre of his nature, and lights up every subject he touches with his genial humor.

From this volume alone, the reader might perhaps get the impression that the Dean of Rochester, while a genial and pleasant man, was one of little power, but he is one of the most celebrated preachers in England; when he occupies the pulpit of Rochester cathedral, it goes hard with any other minister who may be holding service at the same time, for the people flock to hear him.

It is a pleasure to make the acquaintance of such a man. It helps one's faith in human nature. "More Memories" ought to have a large sale.

MASTER AND MAN.

Many of the readers of The Gazette will doubtless remember the Rev. William Burnett Wright, who was here a year ago, and preached in many of our city pulpits and at the Y. M. C. A. He is an earnest and sincere man, and he has written a book that has the same qualities. It is published by Messrs. Houghton, Mifflin & Co., and he calls it "Master and Man." It is really a series of talks on the sermon on the Mount, as applied to the life of our time. Mr. Wright believes that any man may find in that wonderful discourse all the principles that are necessary to guide him in his journey through life. He believes that it was meant for such a guide, and that it behoves Christian people to apply it. He shows which is the right, that as a matter of fact it is not the rule by which the lives of Christians are usually guided, and he puts it to them, if they may, whether they ought not to change their manner of life.

Mr. Wright is a great admirer of George MacDonald, both as a man and as a writer, and one of the most interesting chapters in the volume is an account of a visit he made to the great Scotman at his home. Perhaps we may no longer compliment to Mr. Wright's book than to say that the spirit of it is the same spirit that animates the books of MacDonald. It will be found very suggestive reading, and we do not doubt that many of those who heard Mr. Wright when he was here will be glad to have this volume.

DECEMBER MAGAZINES.

The Review of Reviews is as alert and up-to-the-times as ever. Its editorial department is conducted more on the lines of a first-rate newspaper than on those usual in magazine offices—and of course we mean this as a compliment. It is bright, lively, incisive, and up-to-date. In the current number, the results of the recent elections are discussed with Mr. Shaw's customary brevity and note of asperity. His faculty of condensation allows him to treat of a great many topics in a small space, and at the same time to say something worth while about each topic. This department is always a most useful review of the month's events. The character-sketch this month is of the new millionaire-socialist Mayor of Francisco, Mr. Adolph Sutro, and it will be read with interest by all those who wish to understand the phenomenon of his election. One of the notable articles of the number is Mr. Robert Underwood Johnson's, on forest reserves. Mr. John-

THE SUNDAY SCHOOL.

International Lesson for December 16, 1892.—The Twelve Sent Forth—Matthew 10:1-6.

Specimen Arrangement from Peloubet's Notes.

GOLDEN TEXT.—As ye go preach saying: The kingdom of Heaven is at hand.—Matt. 10:7.

PLACE IN THE LIFE OF CHRIST.—Is toward the end of the second year of Jesus' ministry.

INTERVENING EVENTS.—Jesus' soul had spoken to the people the parables of which our last lesson contained for the same evening. He recited the Sermon on the Mount. Then followed (1) The Sigh of Temptation, (2) The Restoring of the Demoniac of Gadara, (3) Matthew's Feast, (4) The Raising of Lazarus, (5) Jesus' Resurrection, (6) The Ascension.

THE THIRD CIRCUIT OF GALILEE.—The tour lasted through the year.

PLACE.—Some village or town in Galilee. The exact place is unknown.

LESSON NOTES.

The Workers.—V. 5. These we behold, whom He has chosen a few months before on the Mount of Beatitudes, for special training. For an account of them see Lesson vi. of this quarter.

SENT FOR.—V. 6. Two by two. Mark 6:7.

MAKING SIX DELEGATIONS.—Each going in its own direction. For the first time

Jesus says, "Ye began to send" the apostles are sent out alone to their work, to train them for the time, on a year and a half later, when they

would have to carry on the work without the visible presence of their Master.

THEY WERE SENT TWO BY TWO.—(1) Because each would supplement the work of the other. They would reach different classes of minds, and where one failed the other would be ready with the right word. (2) They would aid and encourage one another, keep up each other's courage in time of difficulty, be suggestive of aims, and aid one another's warmth and glow of spirituality. "With two there is warmth."

(3) Two is the best number. None would be a hindrance, and would be divisive, while two would accomplish much in a year, more could do.

IT IS STATED.—"It is a notable fact that the visible presence of the Master

is not mentioned in the

scripture, nor will we tell how the story ended. It is a story that is worth reading to find out what happened, as well as for the character-drawing of the principal personages in it. It is a strong story, and well told vivid, picturesque, dramatic.

Mr. Pusey has struck a new vein, and it runs high in play dirt.

THE LABOR QUESTION.

The labor question, the discontent in the West, the power of the pugnacious in the new State of Colorado, the future of woman suffrage, the peace of Europe, the approach of the death of the Czar—these are some of the important subjects taken up in the December Forum, the full contents of which are as follows: "The Parallelization of Currency Reforms," an examination of and argument for the plan for an elastic currency that was recently proposed at Baltimore by the Bancroft convention, by Mr. A. B. Hepburn, formerly controller of the currency and president of the Third National bank of New York; "Death of the Czar and the Peace of Europe," a review of the political and diplomatic status of every European State, by Colonel Theodore A. Dodge, who is now in Europe; "Status and Future of the Woman Suffrage Movement," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. Ehrich, of Colorado, pronouncing the plan of employees holding stock as means of insuring their loyalty and the bringing about of a better understanding; "The Reading Habits of the English People," by Dr. Mary Putnam Jacobi; "The Chief Influences on my Career," an auto-biographical article of melancholy interest, since it is the last piece of literary work done by the late Philip Gilbert Huxley; "May a Man Conquer his Business," by He Please? an article on the most pressing aspects of the labor question, with the Chicago strike investigation by Colonel Carroll D. Wright; "Stock-Sharing as a Cure for Labor Troubles," by Mr. Louis R. NEW BUSINESS BLOCK.

E. W. GODDINGS GETS CONTROL OF A FINE CORNER.

It is at Kiowa and Tejon—He Will Put Up a Fine Four-story Building—Reed Brothers Engineered the Deal—Other News of an Interesting Character.

Mr. E. W. Giddings, Jr., has purchased from Mr. Judson Berlin an undivided one-half interest in 30,000 feet of ground on the northeast corner of Tejon and Kiowa streets, just across the street from the Hagerman block. The consideration is not named. The sale was effected by the real estate agency of Reed Bros. Mr. Giddings has owned one-half of this property for a number of years, but nothing could be done with it on account of divided ownership.

New Block.

It is Mr. Giddings's intention to improve his ground with a handsome four-story business block, which will be commenced in the near future. The ground floor and perhaps the second floor will be occupied by the dry goods house of Giddings Bros., and the remaining floors will be used for tenant purposes. This is one of the nicest locations in the business district, and the new block will be a handsome addition to the town.

Mr. Giddings has been seeking more commodious quarters for his store for a long time. He has also been dealing successfully in Cripple Creek mines, and the new block may be said to be due to Cripple Creek. This is another verification of the Gazette's prediction that the Cripple Creek mines would have the effect of bringing great prosperity to Colorado Springs.

It is altogether probable that the Giddings block will be put the forerunner of a number of new blocks to be built during the next year in various parts of the business district. The new stores that have been erected during the summer have been filled up as fast as they were finished, and there is a constantly increasing demand for more store room. This is not to be wondered at, for while the residential portions of the city have more than doubled in size, the business district has scarcely grown at all. The city is now growing more rapidly than at any time in its history, new dwelling houses are being built on almost every street in the city, there are scarcely any vacant houses, and the business quarter must grow to keep pace with the growth of the city. Colorado Springs has never kept pace with its resources, and it is just now beginning to expand as it should.

There is quite talk of two or three other proposed business blocks to be begun within a few months.

FATAL ACCIDENT.

Albert Walker, a Sixteen Years Old Boy Killed.

Yesterday afternoon about 2 o'clock young Albert Walker, a boy of 16, was accidentally killed while out hunting. The boy is the youngest son of Mrs. W. S. Walker, a widow lady who resides on South Nevada avenue. He has always been very fond of hunting and shooting generally and whenever he could get away went out for a hunt. Yesterday afternoon he took his mother's horse and buggy and went with a young friend, Jean Henry, out south of town. Walker had a double barrelled shot gun. When three or four miles south of town they started down a hill, Walker it seems, hit both hammers of his gun cracked and two cartridges in it. The stock of the gun rested on the floor of the buggy and the barrel rested his against his body. The horse stumbled and the jerk threw the gun out of the buggy. One of the hammers struck against the floor and the cartridge was exploded. The charge of shot went into the body near the center but slightly to the right side. Death was instantaneous without doubt.

Young Henry caught the body of his friend and held him in the buggy and with the other drove for half a mile as fast as he could come. An employee of Mr. F. O. Wood met him and saw instantly that the boy was dead although Henry still thought him alive. He left Henry to watch the body while he came up and told the family and procured assistance. The boy was taken to Fairley's undertaking rooms and is in charge of the coroner. Dr. Marlow does not consider an inquest necessary however.

Albert Walker was just 16 years old. His father, W. C. Walker, was quite a well-known citizen, and died about a year ago after a lingering illness. He was a bright and intelligent boy, a pupil of the High school and a member of the cadets. Yesterday morning he put on his uniform and went to have his picture taken in it. His mother has the deep sympathy of the community, which by the way has had an unusual number of such shocking accidents during the past fall.

W. W. Gossard's Fatal Accident.

Croner Marlow came down from West Beaver creek last evening about 7 o'clock. He brought the remains of W. W. Gossard, the man who was blown to pieces on Friday. They were taken to Fairley's undertaking rooms and prepared for burial. The funeral is to be held this afternoon from the residence on Grant avenue, West Colorado Springs. The coroner decided an inquest unnecessary. The facts in the killing are practically as given in The Gazette yesterday. No one saw the accident and the exact particulars will never be known. An open box of caps had been left not far from the forge and near them was a box of giant powder. It seems probable that the caps were fired in some way and that Gossard was trying to remove the powder. It looks very much as if he had the box in his hands when the explosion came. Deceased left a wife and four children, two of them nearly grown.

THE BIZZING SECTION.

Stories and Gossip Picked up on the Streets.

A bright genius tried to get up a scare on "Change the other day." He came rushing in and asked if any one had heard of a big mining company going to the wall. He did not say which one.

None but the very lowest classes in Japan use the word "Mikado" in speaking of the Emperor. An old resident of the island told me the other day the meaning of the word. It means "squint eye," which you will agree is not a very pretty name for the ruler. It seems that in past times, but not such a very long time ago, either, the Emperor was venerated almost as a god and the royal

family was never seen by the common people. They believed that if any one looked squarely on the face of the Emperor he would go blind from the shining splendor. At any approach of royalty the people only squinted at the covered vehicles, and hence the name.

Here is a head-puzzler that originated with an 11-year-old friend of mine. When you get it all studied out you can go down and make a stay at the State institution in Pueblo. He had a piece of cake and his brother also had a piece, and his remark was as follows: "My piece ain't more than half so small as Joe's." Now what did he mean?

It is wonderful how many distinguished people figure in the criminal courts. I have seen the names of James G. Blaine, Wm. E. Gladstone and G. Cleveland in the records of the Denver police courts. Just at present El Paso county is entertaining Don F. Cameron, who is charged with assault to commit murder.

About the meanest practical joke that I have heard of was played a year or so ago on a Colorado Springs jeweler. A friend of his who had the run of the store quietly gathered up about half a dozen old clocks that had been accumulated and carried them off. They were in all manner of repair. Each clock was given to a different person. The first man rushed into the store and left his clock to be repaired, but insisted that he must have it within the hour. Then came another who was in an equally great hurry, and so on until all the clocks were delivered. The poor victim had never seen business like that before and he stripped off his coat and went to the assistance of his employees in getting the work out on time. When he struck the fifth clock he discovered something familiar and "smelt a mice." His investigations revealed that he had been sweating over those old clocks that had been in his lumber room for years.

Being misrepresented I suppose is one of the penalties of achieving great success. General Grant used to say that there was only one way to meet such things, and that was to ignore them.

Still, it must be provoking to have a penny-a-line writer sending out false and sensational stuff about you just because he wants to fill so many columns of a cheap newspaper. I am led to these reflections by some of the fairy tales that are sent out regarding Mr. W. S. Stratton of this city, who has had such a conspicuous success in mining at Cripple Creek. I have seen lately a story regarding him that has been going the rounds of the Eastern press which among other things says that he went up to Cripple Creek on a Fourth of July and being tired out threw his hat down a hill and declared that there he would locate a claim. According to the story, that claim turns out to be the famous Independence mine.

That seems to me about the worst rot I have heard of. Of course the story is embellished with the statement that Mr. Stratton was a poor carpenter of this city who was absolutely ignorant of mining. Now the facts of the matter are that Mr. Stratton is a practical miner of many years experience. When he went to Cripple Creek, something over three years ago, I doubt if there was a man in the camp who had had the mining experience he had. At that time people were all locating claims in and around Gold and Globe hills if they could, and in that part of the camp generally. He drifted off towards Wilson creek, which was thought by most people to be too far out of the way, but he knew what he was doing. It was not luck but experience that taught him where to dig and that is where many of the early locators in camp missed it. Some of them did actually dig down where there was not the least sign of anything to dig for, and struck it, but at the Independence there were great boulders of rock blocking up that were actually alive with mineral. The first development done at the mine was really nothing more or less than quarrying. I remember how it was the wonder of many of the old-timers who went there to see rock quarried out and sent away for treatment. I believe that was one of the reasons why there were so many adverse reports on the camp at the start. People could not bring themselves to believe that it would last. The element of luck must enter into all mining enterprises, of course, for no one can tell what is under ground, but mining is a legitimate business that must be carried on as intelligently as any other and to do it successfully one must have both luck and experience, then he is fortunate indeed. But like most of the bonanza men of the State with whom I am familiar, Mr. Stratton minded for years and sunk many a dollar before he got what he wanted. He has been mining in this State for at least 25 years and I have heard him speak of his rough experiences in the San Juan, an excitement that came a good many years before most of the kid-glove miners of to-day had ever heard of a mine. Tabor mined in Colorado for 15 years before he struck it; N. C. Clegg had been a prospector all his life; Moffatt has been mining in the State for more than 30 years and was quite poor at one time; Hagerman has been mining coal, iron and lead for years and had the nerve to sink a fortune in the Mollie Gibson before it produced a dollar worth talking about. It is business and experience that tells. Fortunes like Mr. Stratton's are not made by throwing your hat down a hill and yelling out "this is a mine;" and he is not that kind of a miner.

The petition has been filed with the clerk of the District court praying for a change of venue for Dennis A. Dunn. The petition has not yet been docketed because the fee has not been paid. The petitioner is the prisoner known as Jerry Dunn, who was a Boll Hill man last spring. Afternoon went to camp he distinguished himself by shooting at a military captain one day and after some excitement was brought down here in company with a man named Dynamite Shorty. The petition states that they have read in Denver and Colorado Springs papers incendiary articles which make Jerry out to be a desperado, and which they believe have prejudiced the minds of the people of the county so that he cannot have a fair trial here. The petition also contains extracts from Colorado Springs and Cripple Creek papers regarding the doings of Jerry all of which are declared to be untrue. The petition is signed by J. O'Donnell, Pat Manning, John Durfee and 25 or 30 others.

The funeral of W. W. Gossard will occur residence, corner Third and Grant avenue, this afternoon at 2 p.m. from his late General invitation to all friends.

Sheehan Will Not Talk.

Buffalo, N. Y., Dec. 8.—Police Commissioner Sheehan of New York arrived in Buffalo this morning. He left for New York to-night. Mr. Sheehan declined to be interviewed on the subject of his indictment by a New York grand jury.

ELECTION LEADERS.

THE VOTING OF THE MAYOR.

Some Important New Books by Prof. A. T. Scholle.

Statemen—Heavy Rains in England—Drama—Royalty—The czarina's Visit to Great Britain.

to the babies who were named Nicholas and Alice.

The Queen has received the Swiss Envys who are visiting this country with the object of presenting a loyal address to the "Great Mother." She gave them an audience at Windsor, and the dusky warriors were greatly impressed with the grandeur of the reception, the brilliant apartments and above all the soldiers. The delegation consists of Prince Mongengwa (pronounce it any way you like. It isn't Welsh—you can tell that because it hasn't three y's in it) and five native chiefs and an interpreter, the latter of the South African reputation is a man of great stature and was a noted warrior in the Zulu war. At a dinner given by the Baroness Burket-Coutts and her husband (they are spoken of this way), he made a speech in an impressive and earnest manner. Nobody understood it, but as a rule it was very fine—quite so.

The great political leaders have produced notable literary works almost concurrently. Grand Old Man Gladstone was the first in the field with a translation of Horace. The book has been most favorably received and the translation bears comparison with those of his predecessors Sir Theodore Martin, Professor Conington, Rutherford Clark, Sir Stephen George. "We said immediately after an impudent, but very clever collection of parodies by Mr. C. L. Graves who aptly names them the "Zawarden Horace."

The other book is from the pen of Mr. Talfour, the capo leader of the Conservative party, and is called "A Defense of Philogro's Doubt." It has made as big a stir as Gladstone's translation and we English are justly proud of the friendly rivalry existing between the two politicians in the literary arena. It is seldom that statesmen are such capable scientific and literary students.

England has been visited by heavy storms and rains and the consequence is that a large portion of our little island is under water. The city of Bath is completely flooded and the only means of locomotion is by boat. The distress amongst the poor is terrible and whole streets have the water almost to the roofs of the houses. In Surrey too, many cattle and sheep have been drowned and the valleys are like lakes. Even in the London suburbs the basements of many houses are full of water and unless the rain soon cease the damage will increase. It is a big dinner and 3,600 oysters, 500 lobsters, 107 gallons of soup, 120 turkeys, 200 plavers, 300 pounds of bacon, 1,300 Martinis, Chantilly, 1,200 strawberry creams and thousands upon thousands of such little tit-bits are provided. The remains are given afterwards.

London has again been visited with a bomb outrage. It appears to have been a pre-meditated but badly bungled affair, and fortunately not much damage was done. The bomb was placed on the doorstep of a Mr. Reginald Brett, M. P., living in Mayfair. The door was blown in and all the windows were smashed as were the windows of all the houses round about. Mr. Brett is a most harmless man and there is no doubt whatever that his doorstep was singled out by mistake. The reason is not far to seek—next door in fact, for there dwelt the cool-headed intrepid Mr. Justice Hawkins, who has sentences many anarchists to long terms of imprisonment and one or two to death. The compliment should be abdicated and the bomb removed from the auditorium. But the court after a lengthy hearing and some hard swearing gave a decision against them. The theatre did not keep its doors long closed and after a week of "shuttered up" let in an audience once more. A disgraceful scene ensued. A number of giddy youths "went for" the wooden partitions and in a comparatively short time tore them down and took away soldiers as trophies. They howled and yelled and generally behaved like lunatics inviting the London crowd to "come on" etc. This scene will not do the proprietors much good and is a mistaken way of showing sympathy.

Mr. W. H. Coffin, Jr., and Miss Louise Dewey Fisher were duly married at 2 o'clock yesterday afternoon. The ceremony was performed at 21 North Cascade avenue, Rev. Philip Washburn, rector of St. Stephen's church, officiating. Only the relatives and a few intimate friends were present. Immediately after the ceremony the bridal couple left for a short trip, the destination of which was not made public. Mr. Coffin is a well-known young business man of the city and his bride is one of Colorado Springs most popular and charming young ladies. A large circle of friends, especially among the young people, offer congratulations and best wishes. Mr. and Mrs. Coffin will make their home at 21 North Cascade avenue.

Complimentary to Professor Hall.

On account of ill health a year's leave of absence has been granted to Professor Hall, who has occupied the chair of Political and Social Science at the College for the past four years. At a meeting of the students a committee was appointed to take action on his departure. The following expression of regret at the loss suffered by him was adopted.

We, the students of Colorado College, desire to express to Professor William M. Hall, who has occupied the chair of History and Political Economy in this institution for the past four years, our sincere appreciation of the services rendered by him to the College as a whole and to the students individually. We feel that we have enjoyed in having among us a man of such marked ability a privilege which cannot be too highly estimated and which has been of the utmost importance in the work of reorganizing the College and of giving it its present standard which it has attained during the past few years. We feel also that Professor Hall has taken a personal interest in the welfare of the students and that his words of encouragement have materially aided many of our number in the securing of a college education. For this and for the services derived from his helpful influence exerted by him upon our college life, we wish to thank him and to express our heartfelt desire that he may return to take up his work again at the expiration of his year's leave of absence.

WILLIS E. HARTSTORN,
ELIZABETH ROWELL,
MABLE SPICER,
SALLY C. LOW.

Committee on Behalf of the Students.

In an editorial headed "A Rock Fails" The Mining Record calls attention to the "United States Index" a weekly Boston paper which by representing a circulation of 20,000 managed to get a number of advertisements out of the real estate men and brokers of Denver, Colorado Springs and other points of Colorado. The "Index" is a quite a place. But the truth leaked out and many ill-mannered boors quite pestered her by following her about and staring and prying in a disgusting manner. She was very quiet and natural and created a most favorable if unwise impression. A strange event occurred during her stay. She estimated at the apartments that there should be no more than one or two day's pay when she arrived. The "Index" and any one who was not a member of the "Index" was not allowed to stay in the building. The man who is a tramps in the town for a day or two, and she not only keeps on in the rooms but goes personally as godmother

SIMMONS.

State of Colorado, County of El Paso, ss.

In the District Court, John DeWitt Peitz, Plaintiff and Plaintiff, versus William Learned Peitz, an infant under the age of fourteen years, John DeWitt Peitz as trustee under the will of Mary M. L. Peitz for William Learned Peitz, Plaintiff and Mabel Learned, A. T. Scholle and W. E. Newberry, respondents and defendants, and defendants.

The People of the State of Colorado, to William Learned Peitz, an infant under the age of fourteen years, John DeWitt Peitz as trustee under the will of Mary M. L. Peitz for William Learned Peitz, Plaintiff and Grace Hallam Learned, A. T. Scholle and W. E. Newberry, respondents and defendants, greeting:

MINES AND STOCKS.

CLAUDE SACHS.....Mining Editor

SILVER.....\$604 LEAD.....\$3.00

Colorado Springs Exchange.

Colorado Springs, Dec. 13.—Business was a little brighter this morning as far as the bulk of trading counts but prices were nearly all low, especially so in the case of the silver stocks. Both Molle Gibson and A. J. declined a good many cents and the one dropped below the \$1 mark and the other below \$2. The actual selling prices will be better explained in the separate sales list. The strong stock continues the Anaconda. For the past few weeks there have been no sales in it but all the while the price gets higher and higher but the holders of the stock budge never an inch, and it is probable that the first sale will be made near the \$6 mark. The sales in Work do not count for much, it is an actual transaction, of course, but it is only from one bear to another and is probably only one item in the manipulation of the stock. After the sale of 15,000 at \$3, there was an offer of 20,000 at 25%. C. O. D. is still in good demand at 3% without there being stock offered. Pharmacist is stronger and Union is weak.

There was considerable "go" to the second call and things ruled lively in the pit for awhile. The great rush was after Argentum J. The stock sold at from \$1 to \$4 and closed at \$1. Over 5,000 shares changed hands and there was a big scramble to get it at the lower quotations. Work was again busy from the same cause as the morning though the buyers were more varied. Creede and Cripple Creek became suddenly active owing to good reports from the mine, the price of the stock consequently stiffened up a little. Molle Gibson and Portland were both doing a little but need no comment. The call strongly resembled some of the busy ones of last week and a bright finish for the week is expected. The total sales for the day were 98,325.

The separate sales for the first call were: A. J., 300 at 97%; 900 at 99; 400 at \$1.02%; 200 at \$1.05; 500 at \$1.10 and 100 at \$1.11; Creede and Cripple Creek, 1000 at 100%; Isabella, 1000 at 100% and 100 at 100%; Mt. Rosa, 1000 at 3%; Molle Gibson, 250 at \$1.25%; 300 at \$1.35; 100 at \$1.97% and 25 at \$2.00; Pharmacist, 1000 at 3%; 4000 at 25%; 3000 at 3%; 2000 at 3%; Portland, 15,000 at 25%; For the second call they were: A. J., 3250 at \$1.02%; 200 at \$1.10 at \$1.05 and 2400 at \$1.05; Bob Lee, 2200 at \$1.50 per 1000; Creede and Cripple Creek, 15,000 at 1%; and 2000 at 1%; Isabella, 1000 at 1%; Molle Gibson, 700 at \$1.95; and 300 at \$1.92%; Portland, 1500 at 10%; Work, 100 at 3, 10,000 at 2%; 2000 at 25%; and 20,000 at 25%.

THE SABELLA COMPANY.

Paying Off its Debts—Bright Prospects for the Future.

The prospects of the Isabella company were never better than to-day. The debt is being gradually decreased, the interest of the remaining sum looked after and the properties, especially the Buena Vista, are producing well.

A payment of \$10,000 on the company's indebtedness was made from the November ore shipments, and in addition \$3,000 was contributed to the treasury reserve fund. It will be remembered that in October the indebtedness was also cut down \$10,000, and besides paying this \$20,000 of the principal the accruing interest has likewise been taken care of. The total outstanding obligations to-day amount to \$33,000 and from present indications within five months if not sooner, the sum will be paid out of the debt. For December the record of the mine gives promise of being more of an improvement on that of November, when November was over October.

At late the shipments have been mostly from the No. 26 stop at the south end of the second level. An average of the grab samples from the ore sent away the past week was 12.9 ounces gold to the ton. On the third level mineral is being taken out, the grade of which is constantly improving. The shipments now being made average 5 to 12 ounces and the ore chute is growing stronger and of better quality. Such, in brief, is the story from the workings in the Buena Vista ground.

Development is also being carried on in other territory of the company by five separate leases; four on the south end and the north end of the company's property in the Buena Vista ground. From three of the Smuggler leases royalties are just beginning to be paid and the exploitation in these workings gives pleasing evidence of being of some moment in the near future. A good vein has been opened in the Emma and there is hope of its proving a shipper of consequence.

All in all the Isabella properties show greater value to-day than for months. In connection with the fact that the obligations of the company have been so han-

somely reduced within the past 90 days it should be said that not only have the operating expenses been taken care of besides, but also that development has been taken from the stopes. This matter of development ahead is being carefully attended to and looked after in the ground that is being worked under lease as well as in the workings in the Buena Vista. There appears to-day to be but little doubt that the Isabella will be the big and lasting producer of the hill.

Some Exchange Statistics.

The past week, as nearly everyone knows by this time, has been the busiest the Exchange has ever had. The total number of shares traded in the 1st call was 913,000, an average of 152,169 per day and \$3.00 for every call. The heaviest trader during the week was Pharmacist, with 423,800 shares. It started selling at the beginning of the week at 5%, then slumped to 3% but closed at 4%. Summitt was the only stock on the list in which no sales were made. Bob Lee, Pharmacist, Specimen and Mt. Rosa, each had 70,000 shares and over, Work had over 50,000. Argentum J., over 30,000. Molle Gibson, Union, Gold and Globe and Franklin, over 20,000, and Creede and Cripple Creek and Consolidated over 10,000 each.

The greatest values were in Argentum J. and Molle Gibson, and the total value of the stocks traded in, in round figures, was \$180,000. The commissions make a nice income for our brokers and the result of this great success will be wide-spread in its benefits.

Too much stress cannot be laid upon the thorough business methods in which the Exchange is conducted. Not content with letting everyone in to see and hear the actual business transacted on the floor of the house a record of every transaction, great and small, is kept. At any time, any broker's client can see in the book of records what deal was made at any call—there it will be in black and white, the number of shares, the price obtained or paid, and to whom sold or bought from.

Let it be remembered that the Exchange is ruled not by the brokers alone but by representative business men in this city who are in the majority on all committees.

Weekly Leader Extra.

Mr. F. H. Pettingell in his weekly letter says: "Under some reason or other, California, an old-time stock trader was removed from his obligation and addressed from 1 cent to 2, closing at the latter quotation. What prompted this activity I am unable to ascertain."

Regarding the Work property, all unanimously agree that this is one of the most attractive investments in the market at prevailing figures. There are about 40 miners actively engaged on the various claims and with two exceptions under short time leases. A very rich strike has had the effect of strengthening the stock. It closed at 2 7/8 bid, with none offered under 3 1/8. Why it should sell at these ridiculously low quotations few attempt to explain.

It is the belief of those best in a position to know that under favorable circumstances this company will become a dividend payer through the medium of rights from lessees. The Pharmacists are bonded for \$40,000 and those holding the bond anticipate taking it up at maturity. Besides their own working force, they have sub-leased various portions of the claim, thereby making the possible double dividend practicable.

The following is from the weekly letter of Messrs. Doubleday, rope & Co.: "The holders of Molle Gibson will be glad to hear that the directors have declared another dividend of 5 cents, which they will receive on Christmas day. The A. J. has once again become a regular shipper and their output for the next week or two will be at least 30 or 40 tons a day."

We are pleased to be able to state the litigation which has been going on for so long as to which the Lottie Gold vein claim is now at an end. The Lottie Gold vein company have settled the claim by paying Mr. W. R. Mason \$5,000 in cash and the directors have endorsed the company's notes for \$7,000 more to be paid in six months at 8 per cent. The Lottie claim is now leased without bond to Mr. Kuhnlein, 22 months of which lease are still unexpired. Mr. Kuhnlein, who has worked only for about six weeks on the new vein which he opened up, has succeeded in netting in that time some \$1,500. We understand that the vein is a well defined one and runs lengthwise of the claim. An offer of \$30,000 has been refused by the company for their property. This offer was made by Mr. W. S. Stratton who paid that amount for the property which adjoins the Lottie. The number of shares of the company has been increased from 650,000 to 1,000,000. This stock will be placed in the treasury and offered to the stockholders pro rata according to their present holdings, at 3 1/2 cents."

The following is from the weekly letter of Messrs. Gardner & Co.: "An active week at the expense of values. Sales 913,355 shares. The drop in Pharmacist and the lower price of silver started a bearish feeling all along the line. Gibson and A. J. were sold heavily early in the week. The Aspen papers report continued activity and closing was stronger, Gibson especially being in demand, on account of the Christmas dividend of 5 cents declared by Pharmacists. The Pharmacists' stock is in great demand and the company has been in touch with the Lottie Gold vein company for a long time. The Lottie Gold vein company have agreed to take the stockholders' pro rata of the new vein which adjoins the Lottie. The new vein is a well defined one and runs lengthwise of the claim. An offer of \$30,000 has been refused by the company for their property. This offer was made by Mr. W. S. Stratton who paid that amount for the property which adjoins the Lottie. The number of shares of the company has been increased from 650,000 to 1,000,000. STATE ASSESSORS.

THE ANNUAL MEETING
SESSION IN THIS CITY.

Valuable Suggestions for the Coming Legislature — The Assessors Visit The Gazette Building — They Go to Manitou To-day.

The State Board of County Assessors met in this city yesterday in annual session. This body is made up of the assessors of the various counties of the State or their representatives. They meet for the purpose of discussing matters pertaining to assessments throughout the State and to suggest legislation which their experience teaches them would be beneficial. The first session was held in Denver in 1892 and the second in Pueblo a year ago. The officers were all in their places yesterday morning, the president being Geo. L. Aggers of Arapahoe, and the secretary Sim. Cantrel of Denver. The sessions were held in the private room of the County Commissioners, the only recreation from toil that the assessors took yesterday was a visit to The Gazette office. They all buy their books from The Gazette Printing company and they wanted to see the establishment. This they did in the evening and their visit was very much appreciated. The Gazette is under obligations especially to Secretarial Cantrel for favors. To-day the visitors will go to the School for the Deaf and Blind where they will be shown every attention by Professor Dudley and the entire school. In the afternoon they go to Manitou.

There was present at roll call the following: George L. Aggers of Arapahoe; Geo. E. Metcalf of Boulder; J. E. Cole of Chaffee; Warren M. Plotcher of Clear Creek; Hugh Taylor of Douglas; R. M. Sherman of Eagle; M. B. Irvine of El Paso; W. B. Weaver of Garfield; J. A. Ferris of Jefferson; D. A. Weaver of Larimer; Gade Weaver of Phillips; A. J. McCormac of Pitkin; John N. McKee of Pueblo; H. L. Buck of Washington. They are a jolly lot of fellows and Assessors in Entertaining them.

They will attend his annual address and then the meeting got down to business. The following are the recommendations in regard to needed legislation:

1. That the time be changed for making the assessment so that they will be made between April 1 and May 31.

2. That the constitution be changed so that the heads of families have exemption from taxes to the value of \$200 on any kind of personal property.

3. That watches and clocks be taken from the list of personal property and that bicycles and other furniture be put in the list of amount of capital to manufacture. It is also well to separate money from notes and credits.

4. That the laws be changed so that the assessor shall place the value upon all personal property that may be perceptible.

5. That our laws be so changed as to require the State Board of Equalization to value and assess lands owned, used or controlled by railroad companies as in main line, not to exceed 200 feet in width except in cities of the first and second class, which shall be 200 feet together with all tracks, bridges, engines, rolling stock, tools and machinery, other than stationary machinery; also all telegraph and telephone wires and poles. And that the county assessor be required to assess all real estate, buildings, stationary machinery, material and all other property not above enumerated belonging to or used or controlled by said railroad, telegraph and telephone companies in their respective counties, in the same manner as the other property is assessed.

6. That the laws should be so changed as to allow the assessor to extend the taxes by blocks or half blocks when said property is of the unknown kind and of little value, with no improvements, instead of being compelled to extend the taxes upon each lot in said blocks separately.

7. That when the assessment roll is completed the county assessor shall mail notice to all persons corporations named in the known list, to the address therein given, notifying them of the total amount of taxes due upon each parcel of property separately as the same may appear in the said warrant.

8. That it shall be the duty of the county to furnish the assessors of the respective counties with a transcript of all conveyances filed with them for record of property for any public use, such as to the United States, State of Colorado, counties, cities, towns and public schools, or for use of county roads, streets, public parks or anything by which said property becomes legally exempt from taxation; also where conveyances are made of any of the above named property to private persons or corporations by which the same would become taxable property, so that the assessor may be able to correctly exempt or assess such property, as the case may be.

9. That when any church, hospital, sectarian school or charitable organization becomes the owner of real estate that is legally entitled to be exempt from taxation, it shall be the duty of the president or other officer of said organization to notify the assessor of the county in which said property is situated, in writing, giving a complete description of said property, and such notice must be given annually at the time fixed by law for listing other property. Upon failure to give such notice the county shall not be held liable for a refund of any such property that may have been sold for that.

A resolution was also introduced and adopted that the assessors should be allowed to commence distribution of schedules March 1 hereafter.

A resolution to the effect that military and county poll taxes shall be abolished was referred to the State Board of County Commissioners to discuss.

Another resolution adopted was that all assessors should receive a salary to be fixed by the legislative committee as chosen.

A resolution presented by Mr. Ferris and adopted was to the effect that the laws be changed so that after an assessment is made on the lands are the same approved by the board of equalization, no rebate shall be allowed by the board of county commissioners unless the petition be favorably recommended by the county assessors; also that the laws be so amended as to fix the maximum levies by state, county, city, town, school officers for various purposes.

The selection of officers for the coming year resulted as follows: President, George L. Aggers of Arapahoe; vice president, J. A. Ferris of Jefferson; secretary, Sim. W. Cantrel of Arapahoe; assistant secretary, Hugh Taylor of Douglas; treasurer, M. B. Irvine of El Paso. Glenwood Springs was selected as the next meeting place.

A short session will be held this morn-

ing, after which adjournment will be taken.

Known the 16th.

On Sunday the congregation of the First Christian church of this city made a Herculean effort and raised it debt. The subscription was the largest ever made in this city in one day for church purposes. The pastor had invited Rev. J. W. Ingram of Denver to assist him for the day and after the morning service a statement of the church debt was made. It showed that the aggregate was about \$1,000, and subscriptions were asked for. At the close of the service the amount \$100 had been subscribed either in cash or gold pieces. Of this amount \$7,500 was subscribed by 10 men on condition that the remainder should be raised by general contributions. There is no doubt but that the citizens generally will see that the remaining thousand is subscribed. Among the heavy subscribers were the Messrs. Bernard, Rouse and Eaggerly of the Elkton, E. R. Stark of the Raven, a niece of Mr. W. S. Stratton, Mr. Morse of the Union company and others. A year or so ago the congregation was one of the weakest financially in the city but to-day it stands strong, the result of Cripple Creek. It is a matter of congratulation that this money has come into the hands of men and women who will use it for such noble purposes. Rev. B. B. Burton, pastor of the church, has been connected with it for less than a year and the raising of the church debt is only one of the many evidences of his work here.

Resolutions of Respect.

A committee from the pupils of the Eighth grade of the public schools has prepared the following resolutions:

Resolved, That we, the undersigned, express, on behalf of the pupils of the Eighth grade, our great sorrow at the death of Mrs. Walker, our esteemed friend and classmate, and our sympathy with his bereaved family.

Resolved, That a copy of this resolution be sent to Mrs. Walker, and be published in the Lever and the daily papers.

FRED ALBEN.
FLORENCE MARTIN.
JESSIE MORSE.
FRED REYER.

VSS LINSDAY'S CONCERT

An Excellent Entertainment at the Congregational Church.

Miss Ella Lindsey made her first appearance in concert at a concert given by the Y. P. S. C. E. of the First Congregational church last evening and is safe to say that anyone of the 150 who were present will eagerly take advantage of any opportunity to hear her again. She has a very sweet alto voice of good volume and carefully trained, added to an unusually attractive presence. Her selections included both classical music and ballads. She was encoraged for every number and received a handclap of tribute of flowers. Miss Lindsey is really a noted singer of Colorado Springs.

Mr. Percy Hemus was also heard for the first time. Mr. Hemus is a baritone with a flexible well-trained voice. He received several encores.

Part of Mr. Dietrich's numbers on the programme had to be omitted but the two violin solos he gave were full of enjoyment for the lovers of fine violin music.

Mr. McCall was greeted with applause on every appearance as accompanist, though he only played one solo, Buck's magnificent "Triumphant March" upon the organ.

The Bad Ite Situation.

The situation regarding the Ite in San Juan county is very much cleared up by the statement of the de-legate of the delegation that arrived in this city Monday night. They declare that the Indians are in San Juan in large force—six hundred or more, a large proportion of this number being fighting men, armed with revolvers and Winchesters. These Indians are reported as being impudent and arrogant, claiming everything in sight, and announcing that their agent at Durango (Colonel Day) had told them that the whole country and everything it contained was theirs. Ignacio indeed is loitering behind the main body expecting daily to receive the documents that will confirm his title to all that region. The Indians are said to be without subsistence, and to be living on the cattle they captured that belong to gentlemen in that country.

Telegrams and telephone messages have sent to all the towns in the vicinity to be on the lookout. A posse of citizens went in search this morning, but as yet they have not returned.

The citizens of Denver will tender a grand reception and bid to Governor

Al. W. McElroy, on the evening of Jan. 8, 1895. The programme concluded with a speech by the de-legate on the occasion in the return of the Brown Palace, from 8 to 9:30 p. m., and the inauguration at the Broadway theater, beginning at 10. Supper will be served at the Brown Palace at 11. The price of tickets, including supper, has been fixed at \$5 a couple; extra ladies' tickets \$2.50 each. Invitations will be sent out from headquarters, 18 Brown Palace hotel, on Dec. 20, and citizens of Colorado are requested to send applications for same, as it is desired to reach all who care to attend the ball. No invitations are required at the general reception. Tickets will be reserved in the order of application and be on sale beginning Dec. 20.

6. That the laws should be so changed as to allow the assessor to extend the taxes by blocks or half blocks when said property is of the unknown kind and of little value, with no improvements, instead of being compelled to extend the taxes upon each lot in said blocks separately.

7. That when the assessment roll is completed the county assessor shall mail notice to all persons corporations named in the known list, to the address therein given, notifying them of the total amount of taxes due upon each parcel of property separately as the same may appear in the said warrant.

8. That it shall be the duty of the county to furnish the assessors of the respective counties with a transcript of all conveyances filed with them for record of property for any public use, such as to the United States, State of Colorado, counties, cities, towns and public schools, or for use of county roads, streets, public parks or anything by which said property becomes legally exempt from taxation; also where conveyances are made of any of the above named property to private persons or corporations by which the same would become taxable property, so that the assessor may be able to correctly exempt or assess such property, as the case may be.

9. That when any church, hospital, sectarian school or charitable organization becomes the owner of real estate that is legally entitled to be exempt from taxation, it shall be the duty of the president or other officer of said organization to notify the assessor of the county in which said property is situated, in writing, giving a complete description of said property, and such notice must be given annually at the time fixed by law for listing other property. Upon failure to give such notice the county shall not be held liable for a refund of any such property that may have been sold for that.

Known the 16th.

On Sunday the congregation of the First Christian church of this city made a Herculean effort and raised it debt. The subscription was the largest ever made in this city in one day for church purposes. The pastor had invited Rev. J. W. Ingram of Denver to assist him for the day and after the morning service a statement of the church debt was made. It showed that the aggregate was about \$1,000, and subscriptions were asked for. At the close of the service the amount \$100 had been subscribed either in cash or gold pieces. Of this amount \$7,500 was subscribed by 10 men on condition that the remainder should be raised by general contributions. There is no doubt but that the citizens generally will see that the remaining thousand is subscribed. Among the heavy subscribers were the Messrs. Bernard, Rouse and Eaggerly of the Elkton, E. R. Stark of the Raven, a niece of Mr. W. S. Stratton, Mr. Morse of the Union company and others. A year or so ago the congregation was one of the weakest financially in the city but to-day it stands strong, the result of Cripple Creek. It is a matter of congratulation that this money has come into the hands of men and women who will use it for such noble purposes. Rev. B. B. Burton, pastor of the church, has been connected with it for less than a year and the raising of the church debt is only one of the many evidences of his work here.
